Accessing Interprofessional Education

Some sources with reference to health and social care

All the sources cited are in the English language and refer to interprofessional education (IPE) in health, social care and other fields with reference to collaborative practice and the improvement of care and safety. Those in Section One have been written since 2000 and can be accessed on the internet free of charge. Those in Section Two are books published since 2000 primarily or substantially dealing with or informing IPE brought to CAIPE’s attention, known to me personally or reviewed in the Journal of Interprofessional Care. Section Three also includes other peer-reviewed journals carrying interprofessional articles. Section Four lists international and national IPE networks each of which is a source of further information.

Please draw my attention to publications to be considered for inclusion in our next update.
