

Project Example for T3 Training Registration

During the T3 training your team will be asked to work on a pre-identified project that you will implement at your institution. The 3.5-day workshop will help complete the vision for the project and identify critical moves needed to move the project forward, including assessment and evaluation opportunities. Follow-up coaching calls will help support the work for this project.

Complete the below template as best as your team can, knowing it may change as you work through the 3.5-day workshop. *(An example is provided on the T3 informational website.)*

Team Name:
Project Description:
List a few goals: <ol style="list-style-type: none">1.2.3. Provide synopsis:
Assessment & Evaluation Plan:
If you have identified some initial measurements or evaluation plans, please provide here:
